PROFESSIONAL SUMMARY

- AWS System Engineer with 5+ years of experience managing cloud infrastructure across 30+ AWS accounts
- Reduced cloud costs by identifying underutilized resources and optimizing usage
- Implemented IAM policies and security controls to meet compliance requirements
- Automated infrastructure and routine tasks using Terraform and scripting
- Improved system reliability through monitoring, alerting, and issue resolution

---

PROFESSIONAL EXPERIENCE
Tata Consultancy Services Ltd., Pune, India | May 2021 – Present
AWS System Engineer / Cloud Engineer

- **Cloud Management:** Managed 30+ AWS accounts across production and non-production environments using EC2, S3, CloudWatch, AWS Config, CloudFormation, and Security Hub to maintain availability and compliance.
- **Access & Security:** Managed IAM access governance for 30+ accounts by handling 50+ monthly JIRA requests and configuring IAM roles, policies, and security groups for controlled access.
- **Compliance & Monitoring:** Implemented continuous monitoring using AWS GuardDuty, CloudWatch, and AWS Config, supporting compliance validation and completing audits without critical findings.
- **Cost Optimization:** Reduced AWS infrastructure costs by ~60% through rightsizing, scheduling automation (EC2/RDS), and use of Compute Optimizer and Savings Plans.
- **Leadership:** Led cloud optimization initiatives and mentored junior engineers through knowledge transfer sessions, improving team delivery and onboarding time.
- **Collaboration:** Collaborated with DevOps, security, and application teams to deploy secure and scalable AWS architectures aligned with cloud governance standards.

Key Achievements:

- Automated EC2 and RDS start/stop scheduling using AWS services, reducing operational costs and manual effort.
- Improved application performance by ~25% through cloud infrastructure upgrades and optimization activities.
- Contributed to cloud governance initiatives, ensuring compliance and receiving client appreciation for audit readiness and operational standards.
- Led migration of Virtual VDI from VMware to Azure VDI by performing infrastructure assessment, requirements analysis, and stakeholder coordination for a smooth transition.
- Automated daily health checks using AWS Lambda, IAM, and SES to generate reports for AWS Backup, notifications, certificates, and EC2 disk usage, reducing execution time from hours to minutes.
- Upgraded Terraform configurations across 15 repositories to the latest version, ensuring compatibility, stable deployments, and adherence to best practices.
- Received Xcelerate Award (Rank 3 among 40 employees) for performance in AWS training and project delivery.
- Awarded On-the-Spot recognition within 16 months for teamwork and timely delivery of client requirements.

TECHNICAL SKILLS

- **Cloud:** AWS (EC2, VPC, IAM, S3, RDS, Lambda, CloudWatch, CloudTrail, Config, GuardDuty, Inspector, Organizations, hyperbilling cost tool
- **DevOps:** AWS CI/CD pipeline
- **IaC:** Terraform
- **Containers:** Docker (working knowledge)
- **Security:** IAM governance, network segmentation (basic), compliance audits
- **Monitoring:** CloudWatch, AWS Config, CloudTrail
- **Tools:** Jira, VS Code, Power BI, Prompt Engineering, Agentic coding, Git
- **Operating System:** Linux
- **Coding language:** Python, Agentic coding

PERSONAL PROJECT

AWS Projects | AWS-Projects

- Developed multiple AWS automation and monitoring projects covering AWS Backup, AWS Config, ACM certificates, EC2 disk-space monitoring, AWS Personal Health Dashboard (PHD), service-limit monitoring, and resource tagging.
- Automated AWS resource data collection, health checks, compliance reporting, and governance across multiple AWS accounts, using AWS Lambda, EventBridge, S3, IAM, and SES for automated email reporting.

Python Projects | Python-Projects

- Developed Python applications using data structures, file handling, exception handling, input validation, and control flow. Built projects including ATM Management, Employee Records, CSV processing, and Linux Log File Analysis.

Linux Secrets Manager Linux-Projects

- A Bash-based command-line authentication project for user registration and login using Linux file handling and shell scripting.
- Demonstrates Bash fundamentals including input validation, grep, file management, conditional logic, and password handling.

Power BI Dashboard Development PowerBI Dashboard

- Developed an interactive dashboard for sales analysis, integrating data from multiple sources to provide actionable insights.
- Enabled stakeholders to track KPIs and make data-driven decisions, resulting in a 15% improvement in sales forecasting accuracy.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- AWS Certified CloudOps Engineer – Associate
- AWS Certified AI Practitioner
- Claude Certified Associate – Foundations (CCAO-F)
- IIT Kharagpur AI4ICPS Certificate Programme

EDUCATION

Masters in Business Analytics
Sinhgad Institute of Business Administration and Comp. App, Pune, India | Nov 2022 – Jun 2024

Bachelors in Electrical Engineering
AISSMS College of Engineering, Pune, India | Jun 2015 – Jun 2019
